What is the value of x that satisfies the two systems of equations given below? $(x \geq 0)$

$x^2 - y = 18$
$x = 2y + 8$

(A) -4
(B) -2
(C) 2
(D) 4

Elizabeth is participating in a quiz show. For every question she gets correct, she earns 2 points. For every question she gets incorrect, she loses 1 point. If there are a total of 20 questions and she earned 19 points in total, how many questions did she answer incorrectly?

(A) 6
(B) 7
(C) 8
(D) 9
